WATER RESOURCES BULLETIN 2-13
WATER WELL RECORDS FOR ONTARIO
COUNTIES OF HALIBURTON AND PETERBOROUGH
1946-1969

INTRODUCTION

This bulletin contains water well record data for the counties of Haliburton and Peterborough for the period 1946 to 1969. Table 3 lists previous publications in which similar data have been published.

Water well record data in this bulletin are produced from the print-out of computer-stored data. The pertinent details about the data are explained in the section entitled "Explanation of Column Headings".

The original water-well records may be referred to by the public at the office of the Water Resources Division, Hydrologic Data Section at:

40 St. Clair Avenue West,
Toronto, Ontario.

Enquiries

Enquiries about this publication should be addressed to:

The Supervisor,
Hydrologic Data Section,
Water Quantity Management Branch,
Ministry of the Environment,
135 St. Clair Avenue West,
Toronto, Ontario.
M4V-1P5.

Acknowledgements

The bulletin was prepared by staff of the Hydrologic Data Section who were ably assisted by the Branch EDP liaison officer, staffs of the Water and Well Management Section, and the Systems and EDP Section.

The assistance and service rendered by the water-well boring and drilling contractors who submitted the water-well records is gratefully acknowledged.

WATER WELL RECORDS

All water-well records forwarded by contractors are on file at the offices of the Ministry of the Environment in Toronto.

Most of the important information from the records has been compiled in this bulletin. Table 1 is a summary of data. Most information is essentially as supplied by the driller. Some terms employed by drillers have been altered to conform to a standard list of materials which appears under "Material Abbreviations" in the section that follows.

The pumping-test rates, reported in gallons per minute, are the result of short term pumping tests. They do not necessarily represent the rates at which the wells could continue to supply water for prolonged periods of pumping. Continuous pumping at the stated rates could have resulted in some of the wells being pumped dry, while others may have been capable of being pumped steadily at much higher rates than those carried out during the pumping tests.

In the classification of water use, public supply (PS) included supplies for municipalities, churches, schools, hotels and buildings occupied by several families or groups of persons; commercial (CO) included supplies for garages, stores, restaurants; industrial (IN) included supplies for factories and dairies; irrigation (IR) included supplies for greenhouses, market gardens and other crops. The other terms used are self-explanatory.

Many test holes had no water-data recorded. In most of these holes some water may have been encountered. But as a large supply was being sought, no record was made of water information from formations which were likely to yield a supply far below the required quantity.

Licensed Boring and Drilling Contractors 1962-1969

Table 2, page 274, is a list of licensed water-well boring and drilling contractors and the number of wells constructed by each contractor in the counties of Haliburton and Peterborough in each year from 1962 to 1969. This period was chosen to show which drillers have been active in recent years. The contractors listed may have constructed wells in other areas during this period.

EXPLANATION OF COLUMN HEADINGS

MUNICIPALITY	Municipal names, current at the time of printing, are used in the bulletin. Changes in municipalities are indicated by having the old names appear in brackets after the current names, e. g. Peterborough City (Smith) means that wells listed under this heading are in the area which is now part of the City of Peterborough but was formerly part of the Township of Smith. In such cases, the survey descriptions given are for the former municipality, i. e. the Township of Smith.
WELL NO.	(Well Number) This is a unique number within the county or district under which it is listed; combined with the county or district number it is unique within the province.
UTM EASTING NORTHING	<p>(Universal Transverse Mercator Co-ordinates in Metres)</p> <p>This location system makes use of a square grid, 1000 metres x 1000 metres which is superimposed on maps of the National Topographic System. The vertical grid lines are called Eastings and the horizontal lines Northings.</p> <p>The Easting represents the distance of a well in an easterly direction from a given north-south reference line. The Easting is the upper figure in the column.</p> <p>The Northing represents the distance of a well in a northerly direction from a given east-west reference line. The Northing is the lower figure in the column.</p> <p>The Eastings and Northings allow the plotting of wells on the National Topographical maps directly from the bulletin. Each map contains an explanation on the use of the co-ordinate system.</p>

The wells were plotted on topographic maps from diagrams submitted by the drillers, and the UTM co-ordinates were determined from the plotted locations. In most cases, wells drilled after December, 1967, were plotted directly on the topographic maps at the time of a field check by Water Well Inspectors; these locations have a greater reliability than those of the earlier records.

ELEV
FEET

(Elevation in Feet) This represents the ground elevation at the well site in feet above mean sea level. The elevations were determined from plotted locations on the National Topographical maps and are therefore related to the accuracy of the locations and the scale of the maps.

DATE

The month and year of well completion are given in this column.

DRILLER

The driller's license number is given. Table 2 is a numerical listing of drillers and their addresses.

CSG
DIA
INS

(Casing Diameter in Inches) Casing diameters are shown to the nearest inch. Where several sizes of casings are used, the diameter of the upper casing only is given.

KIND
OF
WATER

The following abbreviations were used to record the kind of water reported by the driller:

FR	Fresh
SA	Salty
SU	Sulphur
MN	Mineral

WATER
FOUND
FEET

This is the distance or distances in feet below ground level at which the driller reported the occurrence of water.

STAT
LVL
FEET

(Static Level in Feet) This is the distance to the water below ground level when the well is not being pumped. Static levels above ground are not given; the notation FLW, representing a flowing well, is given for this condition.

PUMP
LVL
FEET

(Pumping Level in Feet) This is the distance to the water below ground level at the end of a pumping test or the start of a recovery test.

TEST
RATE
GPM

(Pumping-Test Rate in Imperial Gallons per Minute)

This is the rate at which the well was test-pumped. In some cases the stated rate is a recovery rate, or the rate of flow of a flowing well.

TEST
TIME
HR/MN

(Test Time in Hours and Minutes) It is the length of time during which the pumping or recovery test was conducted. Test times of 100 hours or greater are shown as 99 hours 59 minutes.

WATER
USE

The following abbreviations are used to describe water use:

Domestic	DO
Stock	ST
Irrigation	IR
Industrial	IN
Commercial	CO
Municipal	MU
Public Supply	PS
Cooling or Air Conditioning	CA

OWNER/LOG

The name of the original owner of the well is given on the top line.

The materials for each formation are described by standard abbreviations. They are listed in predominant order, i.e. the most common material first and other materials after. General colour qualifications are given where pertinent. The following examples illustrate the principle:

msnd grvl	- sand and gravel
grey clay fsnd grvl	- grey clay with fine sand and gravel
brown grvl csnd	- brown gravel and course sand

Material Abbreviations

Unknown	UNKN
Fill	FILL
Top Soil	TPSL
Muck	MUCK
Peat	PEAT
Clay	CLAY
Silt	SILT
Quicksand	QSND
Sand or Medium Sand	MSND
Fine Sand	FSND
Coarse Sand	CSND
Gravel	GRVL
Stones	STNS
Boulders	BLDR
Hardpan	HPAN
Limestone	LMSN
Dolomite	DLMT
Shale	SHLE
Sandstone	SNDS
Slate	SLTE
Quartzite or Quartz	QRTZ
Granite	GRNT
Greenstone	GRSN
Previously Dug or Bored	PRDG
Previously Drilled	PRDR
Overburden	OBDN
Rock	ROCK

Colour Abbreviations

White	WHIT
Grey	GREY
Blue	BLUE
Green	GREN
Yellow	YLLW
Brown	BRWN
Red	RED
Black	BLCK

DEPTHS IN
FEET TO WHICH
FORMATIONS
EXTEND

Each depth given represents the bottom of the formation which precedes the number. The last number for each well generally indicates the total depth of the well. Wells terminating at the bedrock overburden interface are coded to show a one-foot penetration into the rock.

Survey abbreviations

The following abbreviations are used to designate tracts of land and surveys:

<u>Abbreviation</u>	<u>Land Area</u>	<u>Municipality</u>
C R E	Chemung Road East	Smith Township
C R W	Chemung Road West	Smith Township
L B I	Large Burleigh Island	Smith Township
N S	North Section	Burleigh Township
S S	South Section	Burleigh Township
